Kalcret BNX

Brand: Cannon
Product Code: 0013803044430-20D
Availability: 200
Weight: 25.00kg
Dimensions: 50.00cm x 30.00cm x 20.00cm

Short Description

With KALCRET troweling compound, it is possible to protect horizontal, vertical, sloping, and curved surfaces. Safe overhead processing is also easily achievable.

Temperature: up to 400°C

Description

KALCRET is a wear-resistant, high-performance concrete made of high-strength hard aggregates in an
extremely strong cement matrix. The improved compound is matched to the speci c requirements and
provides maximum resistance to erosion and abrasion.

KALCRET is the leading cement-bonded hard aggregate compound on the market. KALCRET combines excellent wear protection properties with ease of use. The speci c advantage of all
compound materials is their exibility in practice. Large surfaces can be coated quickly and reliably to restore
plant availability rapidly.

KALCRET is suitable for lining plant components and pipe systems, including in environmental engineering
applications such as air and water ltration plants, in waste incineration plants, in power plants, in plants that
produce construction materials, in cement works, and in the steel industry

Specification

Wear stress

bauxite hard material	B
Temperature range	
up to 400°C	N
Processing method	
applied by trowelling	X
